Video Methods Dec 30 2019 This interdisciplinary collection provides a set of innovative and inventive approaches to the use of video as a research method. Building on the development of visual methods across the social sciences, it highlights a range of possibilities for making and working with video data. The collection showcases different video methods, including video diaries, video go-alongs, time-lapse video, mobile devices, multi-angle video recording, video ethnography, and ethnographic documentary. Each method is presented through a case study, showing how it can be used in practice. The authors offer pragmatic advice and discuss practical issues, including equipment, techniques and skills, analysis, and presentation. They also show how video methods can be used in a range of different contexts – at train stations, on bicycles, in schools, outdoors, and in museums – to investigate worlds that are visible, audible, tangible, and in motion. In doing so, they illuminate the theoretical possibilities that video methods offer for researching the body, identity, everyday life, affect, time, and space.

The Video Game Theory Reader 2 May 15 2021 The Video Game Theory Reader 2 picks up where the first Video Game Theory Reader (Routledge, 2003) left off, with a group of leading scholars turning their attention to next-generation platforms—the Nintendo Wii, the PlayStation 3, the Xbox 360—and to new issues in the rapidly

expanding field of video games studies. The contributors are some of the most renowned scholars working on video games today including Henry Jenkins, Jesper Juul, Eric Zimmerman, and Mia Consalvo. While the first volume had a strong focus on early video games, this volume also addresses more contemporary issues such as convergence and MMORPGs. The volume concludes with an appendix of nearly 40 ideas and concepts from a variety of theories and disciplines that have been usefully and insightfully applied to the study of video games.

However, the development of automated techniques for aggregating and interpreting information from multiple video streams in real-life scenarios is a challenging area of research. Collecting the work of leading researchers from a broad range of disciplines, this timely text/reference offers an in-depth survey of the state of the art in distributed camera networks. The book addresses a broad spectrum of critical issues in this highly interdisciplinary field: current challenges and future directions; video processing and video understanding; simulation, graphics, cognition and video networks; wireless video sensor networks, communications and control; embedded cameras and real-time video analysis; applications of distributed video networks; and educational opportunities and curriculum-development. Topics and features: presents an overview of research in areas of motion analysis, invariants, multiple cameras for detection, object tracking and recognition, and activities in video networks; provides real-world applications of distributed video networks, including force protection, wide area activities, port security, and recognition in night-time environments; describes the challenges in graphics and simulation, covering virtual vision, network security, human activities,

cognitive architecture, and displays; examines issues of multimedia networks, registration, control of cameras (in simulations and real networks), localization and bounds on tracking; discusses system aspects of video networks, with chapters on providing testbed environments, data collection on activities, new integrated sensors for airborne sensors, face recognition, and building sentient spaces; investigates educational opportunities and curriculum development from the perspective of computer science and electrical engineering. This unique text will be of great interest to researchers and graduate students of computer vision and pattern recognition, computer graphics and simulation, image processing and embedded systems, and communications, networks and controls. The large number of example applications will also appeal to application engineers.

Creating DSLR Video May 03 2020 Nearly every DSLR camera available today also shoots beautiful high-definition video. YouTube and Facebook are bursting with user-generated content as people share their memories and travels. Whether it's highlights from a great vacation, the kids' soccer game, or family gatherings, everyone wants to create compelling video to document it. While DSLR cameras are quite capable of shooting video, for many, their foray into video shooting can be frustrating. Footage tends to be dark and out of focus and suffers from camera shake and bad audio. In Creating DSLR Video: From Snapshots to Great Shots, photographer and video expert Rich Harrington demystifies the process and teaches a solid foundation for capturing great video. Whether readers have been dabbling in video already or have never even used that mode on their camera, they will learn how to go from capturing mediocre video to creating compelling footage--and all the steps in between! Readers will also learn the essentials of video editing and publishing to the web; how to make the most of their existing equipment; affordable options to improve video capture; and much more! To supplement the book, readers will gain sample videos that further demonstrate the techniques presented in the book.

DSLR Cinema Jun 27 2022 Large sensor video cameras (DSLRs) offer filmmakers an affordable, high-quality image previously impossible without high-end cinema cameras. These video-capable DSLR cameras have revolutionized filmmaking, documentary production, journalism, television, and even Hollywood cinema. This book empowers the filmmaker to craft visually stunning images inexpensively. DSLR Cinema presents insight into different shooting styles and real-world tips and techniques indispensable to any DSLR filmmaker. This updated and expanded edition includes new workflows for Adobe Premier and Final Cut X--from syncing external audio settings to using the right settings. It also covers the workflow for using Technicolor's picture style, CineStyle, designed on consultation with Canon scientists.

DSLR Cinema features case studies of an international cast of cutting edge DSLR shooters, including Philip Bloom, Shane Hurlbut, Bernardo Uzeda, Rii Schroer, Danfun Dennis, and many more. The films are examined in detail, exploring how each exemplifies great storytelling, exceptional visual character, and how you can push the limits of your DSLR.
